

Review

- You must decide which job offers to accept.
- You must decide which of your current jobs to work on.
- You are paid for completed jobs, and penalized for ones you fail to complete.
- Some jobs will be better than others, so you will have to decide whether an offered job is worth accepting.

Second Day

- Payments today will be more sensitive to your performance
- Each period, you pay 70 cents (think of this as costs to keep the business running).
- But, all jobs pay 4x as much as before
